

Figure 8 Easy Tutorial

chapeaudujour.blogspot.com

List of supplies:

32" of spring wire, 1 wire joiner, 32 1/2" of Fabric Tubing (or I made felt tubing from a felt rounding), Trim.

I measured 32" spring wire and attached the joiner on one end.

I sewed a tube from an old felt rounding using the guide.

The wire was threaded through the felt tubing. The wire was joined with the joiner and the ends sewn together.

Twist the round covered wire into an 8 shape. It will make a clicking noise. Pin where you want the Hinge to the clamp to be.

Sew the connection together.

I added a 1 1/2" x 1" piece of felt to cover the connection.

Finished and.....

Clamped on my Beautiful Poupée.

I trimmed it with a vintage berry vine.
