

How to Make a Bird Cage Veil

Start with a 1 yard piece of veiling.

Trim the top 2 corners (round them) to keep the bird cage veil from being too puffy.

Thread a needle with a matching colored thread.

Tie a knot at one of the bottom side edges to the veiling with the thread.

Stitch up along the side over the top and down the other side by going in and out of the holes in the veiling.

Gather thread and knot securely.

Sew a comb to the knot.

Voila!
